Mongoose + Workday: Two-Way Data, Always in Sync

Mongoose, the AI Engagement Platform, automates your two-way data integration with Workday, ensuring your student information is always synchronized and up-to-date for optimal efficiency and accuracy.

Importing Data into Mongoose

Field Mapping

Automatically import contact data from Workday into Mongoose, creating and updating records.

Custom Flexibility

Import custom fields for personalized engagement and improved data segmentation in Mongoose.

Team Configurations

Different teams can use specific fields from various Workday reports for unique needs.

Messaging Activity Updates

Export all incoming and outgoing text messages from Mongoose into Workday as "Notes" in real time.

Comprehensive Communication History

Maintain a complete text message history within Workday contact records.

Activity Monitoring

Transparently track and log message export activities within Mongoose's integration settings.

Setup and Data Flow

Easy Configuration

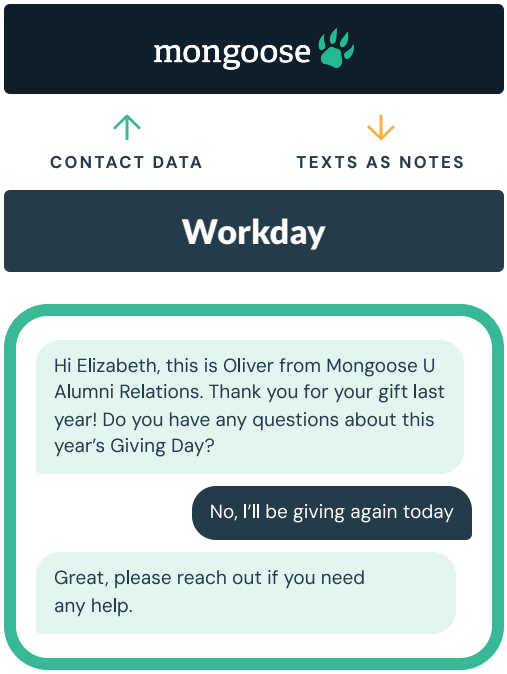

Mongoose offers a simple setup process within our user interface, allowing you to easily configure the integration and establish a reliable data flow with Workday.

Leverage Existing API

Using Workday's existing API and web-enabled custom report functionality, Mongoose ensures that your standard processes remain uninterrupted while integrating new data.

Scheduled Data Imports

With the ability to schedule automatic data imports up to four times daily, Mongoose keeps your data current without requiring manual updates.
